

GEARENCH™

PETOL™ TONG JACK

Tong Jack with
PETOL Slim Grip Tong

Tong Jack with
PETOL Machine Tong

(tongs sold separately)

Highly Portable

The PETOL™ TONG JACK is a portable, pneumatic powered machine designed for use on threaded material having multiple make-up or break-out points. In addition, the use of “cheaters” or overhead hoists is eliminated when working connections that cannot be made up or broken out by hand.

The unit is suitable for use with a wide variety of PETOL Tongs to meet specific torque, diameter, and gripping width requirements and is capable of producing up to 3,500 lbs. of force. The Tong Jack includes a gauge that reads out in PSI and a chart to convert to pounds of force. The torque being applied depends on the torque arm length of the tong being used.

Selected tongs are held in place with a quick release pin making change out easy. Linkage and release pins are adaptable for both clevis and loop-style handles.

Part No. - TJA35 • Weight - 283 lbs.

Includes gauge with PSI readout and
force to pressure conversion chart

Easy to use quick release pins and
linkage hold tongs in place

Connected to
Clevis-style handle

Connected to
Loop-style handle
