PETOL™ TANK SAFETY GAUGES

— accurate, easy to install and virtually maintenance free gauging systems —

★Further reduce the risk of H₂S exposure with a **NEW** ENCLOSED ASSEMBLY SYSTEM★

Original System

measurement
reads at bottom
of indicator

PETOL™ TANK SAFETY GAUGES greatly reduce risk by keeping lease operators off of tank batteries, thus helping to prevent injuries and accidental deaths due to falls and H₂S exposure when checking tank fluid levels. **The new Enclosed Assembly systems are fully enclosed further reducing the risk of H₂S escaping into the environment and operator exposure.**

The components used in the gauging systems are of the highest quality to ensure years of dependable service. All systems include the following:

- Gauge body produced from highly durable, weather-resistant, clear UV protected polycarbonate material
- Stainless steel seal-bearing pulleys with deep grooved nylon inserts
- Nylon coated, stainless steel cable
- Tank attachments for welded, bolted, or fiberglass tanks
- Custom stainless steel floats
- Reflective vinyl measurement decals
- Nylon tank plug with minimal clearance for cable
